

CHATHAM COUNTY PURCHASING DEPARTMENT

ADDENDUM NO. 1 TO BID NO. 13-0111-4

FOR: WALTHOUR BETZ CREEK BRIDGE REPLACEMENT

PLEASE SEE THE FOLLOWING FOR ADDITIONS, CLARIFICATIONS AND/OR CHANGES:

Responses to Questions received:

1. Q) Is the contractor responsible for coordinating with the utility companies for relocations?

A) *Yes, the contractor is responsible for coordinating with utility companies for relocations once Notice to Proceed is issued.*

2. Q) Are the load test pile needed?

A) *It is not anticipated at this time that the load test pile will be needed. The County reserves the right to require it if warranted by conditions.*

3. Q) On drawing 22-001, it calls out a GA STD for a flared end section. There is not a STD provided for the FES in this set of plans and there is no pay item for the FES. I believe the drawing has the wrong STD listed and it should list a STD for a concrete headwall, which has a STD and pay item in this job.

A) *That is correct. The STD for structures A2 and D2 should be 1001-B for pipe culvert concrete headwall.*

4. Q) Have the deck drains been tested for asbestos?

A) *The deck drains have not been tested. They will be tested and removed if necessary by others prior to the start of demolition.*

5. Q) Are the power lines that cross the road on the north side going to be relocated?

A) *Yes, Georgia Power has been contacted.*

6. Q) I've contacted the City of Savannah Water Resources Bureau in regards to the hanger attachments. No one knows about these attachments. Can you please provide a contact name and number for someone that can provide these attachments?

A) *Cesar Laureno of the City of Savannah Water and Sewer Planning & Engineering Department will be the contact, 912-651-6573.*

THE BID OPENING REMAINS: 2PM, DECEMBER 12, 2013

11-26-13
