Question: Can you give a brief explanation as to what models will be provided for
the three Pipemakers Improvement projects ?

Answer: *Chatham County has several SWMM models, one of which will be provided
to the selected contractor for use in the project. The most recent submittals to
FEMA in the basin have also used SWMM models. If a consultant prefers to use
another program, such as ICPR or HEC_RAS, the data would be there in the
provided model. It should be noted that due to the complex nature of the channel
interactions, a program or model which might be satisfactory in other applications
will not give the correct results at the three project locations; such tools should only
be used for a general check.*
